

eScan Total Security Suite Home and Small Office Edition

eScan Total Security Suite provides unique and comprehensive protection to all your computing devices and safeguards your digital life. It is designed to protect you and your family from all kinds of online threats like Ransomware, Adware, Spyware, Trojans, Spam and Phishing frauds. With its Parental Control, you can restrict or filter website access when your kids go online.

Advanced Protection against Ransomware Threats

Key Features and Benefits

eScan Security Network (Cloud Technology – detects new and unknown threats)

The cloud-based eScan Security Network (ESN) ensures protection against current threats, such as viruses, worms and Trojans. It identifies and blocks new threats. In case of new malwares, it makes a prompt response with an advanced level of detection that provides superior protection.

Advanced Virus Control (Smart Proactive Protection)

With new Advanced Virus Control technology and highly sophisticated heuristics algorithms, eScan effectively scans and detects Zero Day Threats that are continuously released by malware writers.

Parental control

Parental Control uses highly advanced algorithms to block the access of restricted websites, based on multiple categories. This feature is extremely beneficial for parents because it prevents kids from accessing unwanted websites containing vulgar or inappropriate content. It also allows the users to create different types of profiles for different users. Each profile will have different access rights and web access controls.

Secure Delete

This option removes all the traces of the selected files and folders forever. It eliminates all the possibilities of recovering deleted files with any recovery software.

Anti-Theft

This technology prevents your Windows device from any kind of misuse. It allows you to lock your device or erase all the selected data remotely, if it gets lost or stolen. The technology offers another layer of protection against theft with more advanced features that capture images, screenshots, scream, alert, lock and locate.

Faster On-Demand Scanning

eScan's enhanced On-Demand Scanner comprises of smart Whitelisting Technology that leads to faster scan of files, folders, memory, registry, services and all storage devices. Being light on the system resources, it ensures that the performance of your computer is not affected even when eScan software is performing thorough scans.

File Activity Report

eScan Management Console monitors and logs the file activity of the managed computers. It will display a report of the files created, copied, modified, and deleted. Select and filter the report based on any of the details captured. It also allows you to export the generated report in desired file formats such as PDF, Excel, or HTML.

Effective Endpoint Security

eScan effectively prevents data thefts and Virus infections via USB or Firewire-based portable storage device, such as Flash Drives / Pen Drives, SD Card, Imaging devices, Webcam and Portable Hard Disks, thus securing your network from evolving

cyber threats. Its advanced Application Control allows you to block / permit applications and prevents critical threats.

Identity Protection

This module protects sensitive personal information, such as credit card numbers, mobile numbers or passwords for online services. Upon detecting any attempt to send protected information to the Internet by email or instant message, the transmission can be blocked automatically.

eScan Rescue Mode

It is an advanced feature that allows you to boot into a secure environment during system startup without using any optical media. It uses a Windows as well as Linux -based environment that not only helps you to scan and clean the system but also allows you to fix registry changes made by viruses and rootkits.

For more information on Rescue Mode please visit

eBackup

eBackup allows you to take back-up of your important files and folders. It will also allow you to schedule the backup process as per your requirement, you can select the path to save the backup files or save the files to an external hard drive or USB as well.

TSPM

Terminal Services Protection Module by eScan not just detects the brute force attempts but also heuristically identifies suspicious IP Addresses / Hosts. It blocks any attempts to access the system.
